Devfacto & DigitalCtrl

April 5, 2018

BOW VALLEY SQUARE 4
SUITE 2120, 250 6TH AVE SW

Junior to Intermediate Developer

Hi Zana,

About Me

I am currently employed by **Johnson Insurance (RSAgroups)** as a **Software Developer III(intermediate-Level)**, mainly responsible for designing & developing components for **JavaEE** Applications; creating new features and maintaining the legacy system. I also boost a start-up company, providing **Single-page web applications** based on **React & Redux**, and **Native Mobile Apps** based on **React Native** to local business.

A **Master degree in Computer Engineering** helped me understand more deeply towards the binary world. The primary focus of my research is on "PCL-based Human Skeleton Tracking System for medical equipment".

Why Devfacto & DigitalCtrl?

DigitalCtrl is one of the most successful cloud delivery company that delivers inspired Experiences for its clients using all **Adobe Experience Cloud Products**, from which I can obtain a great opportunity to incorporate my personal goals of becoming a high-quality developer.

They're open to the new technologies, and so do I. I always embrace complexity systems and new challenges. I wish to grow along with Devfacto & DigitalCtrl.

Why Me?

I have Solid **2 years Full-time experience** with **Strong Communication skills** (both in oral and written); Ability to **multi-task, prioritize and meet deadlines; Enthusiastic** and **detail oriented**. I went through the details of the position, and my personal qualifications do match the requirements for a full-stack developer:

1. Back end development – **2 years full-time as Java developer including both Frontend and Backend**
2. Front end web development – **specializing in HTML, CSS, JS, React, Redux, GraphQL**
3. Development tools & frameworks – **project experience in full-stack development life-cycle.**
4. Content Management System experience – **WordPress, Google Firebase**

Sincerely,

Zheng(River) Yang
